

LNG handling in practice:

Hands-on LNG training on board of MS Bergensfjord

29th & 30th of May, Bergen & Stavanger

During the two days you will get practical insights into how Norway tackles the challenges around sea- and land-based LNG handling. On board of the *MS Bergensfjord* you will get the unique opportunity to join a LNG course in real life situation- covering the ship side of LNG training, including a visit of the engine- and tank rooms, the bunker station and bridge. Furthermore, you will attend a bunkering and get to meet all involved authorities that set the framework for a safe LNG handling. The visit to a LNG plant will provide a hands-on demonstration of LNG production.
