# MarSat

## More Space for Maritime Operations

**24th September 2019 | 3:00 - 5:00 pm**

Presentation of the results of German Government funded premier research project. MarSat aims at providing innovative satellite based solutions for the maritime industry.

- how to support navigation in poorly surveyed areas and update ENC's from satellite-derived bathymetry
- digital platforms to manage satellite-derived environmental information for maritime operations
- up-to date ice information, rapid and with low band width connectivity

### Venue

east Hotel und Restaurant GmbH  
Simon-von-Utrecht-Straße 31  
20359 Hamburg, Germany

Contact details and registration: [MarSatWorkshop@eomap.de](mailto:MarSatWorkshop@eomap.de)

The workshop is organized and sponsored by

## More Space for Maritime Operations

### Meeting Agenda

24th September 2019 | 3:00 - 5:00 pm

**Dr. Thomas Heege (EOMAP)**

Introduction to the MarSat Initiative: User Forum for Crosscutting Space & Maritime Applications

**Friedhelm Moggert-Kägeler (SevenCs)**

Satellite-Derived Bathymetry for Voyage Planning

**Dr. Knut Hartmann (EOMAP)**

Digital Platforms to Manage Satellite-Derived Environmental Information for Maritime Operations

**Dr. Sven Jacobsen (DLR)**

Sea State Information Service From Space

**Discussion & Recommendations**

on the Evolution of the Open MarSat Forum Activities
