

## SHIP EFFICIENCY

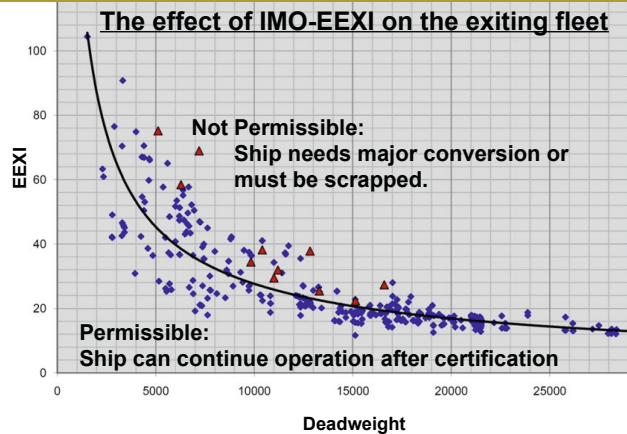

by STG 8<sup>th</sup> International Conference  
Hamburg 27–28 September 2021

### Ship Efficiency – always a challenge

The gas question:  
LNG, Ammonia,  
Hydrogen – Which  
gas will suits me best?

Will EEXI and other regulations destroy the market?

Propulsion:  
New ways ahead or old  
wine in new bottles?

## Save the date, 27–28 September 2021 in Hamburg

The German Society for Maritime Technology, STG, launched this series of conferences to provide a platform for maritime leaders to exchange interdisciplinary ideas and expertise on all questions related to Ship Efficiency.

### Ship Efficiency – don't miss the conference: We help you save!

Meet more than 200 highly qualified maritime leaders from all over the world and visit the accompanying exhibition, where providers of ship efficiency technologies/services show their products/services.

**The German Society for Maritime Technology  
Schiffbautechnische Gesellschaft e.V.**
